

Samer Salem

Computer Science Student

+971 56 671 7147 | samersalem32@hotmail.com | Abu Dhabi, UAE

SUMMARY

Fourth-year Computer Science student at the American University of Sharjah with a strong focus on problem-solving. Completed coursework in data structures, algorithms, web development, artificial intelligence, and numerical analysis. Actively developing technical and analytical skills through practical applications and collaborative projects.

EDUCATION

American University of Sharjah

Sharjah, UAE

Bachelor of Science in Computer Science

2023 – 2027

- Fourth-year student, GPA: 3.30
- Relevant coursework: AI (Python), Programming I & II (C++), Web Applications (HTML, CSS, JavaScript), Computer Systems (Assembly), Data Structures and Algorithms, Design and Analysis of Algorithms, Numerical Analysis, Digital Systems

EXPERIENCE

Data Analysis & Algorithm Development Intern

Dec 2025 – Jan 2026

ZhenHua Oil

Abu Dhabi, UAE

- Developed an Intelligent Decline Curve Analysis (DCA) algorithm using synthetic data
- Focused on algorithm design, code quality, and performance optimization

Digital Intern – Technical Solutions Team

Jun – Jul 2025

ADNOC Onshore

Abu Dhabi, UAE

- Built **TCIO Document Search** on OutSystems Developer Cloud, merging two separate Excel sources into a single searchable, exportable document-lookup tool with field-level search and direct access to files on the network share
- Developed an **ESP Predictive Maintenance** pipeline in Dataiku using Random Forest and Logistic Regression to predict offshore pump failures ~30 days in advance, enabling planned repairs instead of emergency interventions

PROJECTS

BriefUp: AI-Assisted Flashcard Web Application | *Java Servlets, JSP, MySQL, OpenAI API*

Dec 2025

- Built a full-stack flashcard study app (**1st place**, Web Applications course) with session-based authentication and complete CRUD across users, decks, cards, and analytics
- Designed a relational database schema with foreign-key constraints and integrated the OpenAI API with Apache PDFBox to auto-generate flashcards from uploaded PDFs
- Implemented spaced repetition, progress tracking, streaks, dashboards, and leaderboards with concurrent session handling and sub-500ms deck loading

SKILLS

Technical: Algorithm design, User experience, Analytical and critical thinking

Professional: Problem solving, Team collaboration, Communication, Active listening, Willingness to learn
